```
1 CREATE TABLE STUDENT (  
2   Student_ID INT,  
3   Student_Name VARCHAR(50),

17  
18 SELECT * FROM STUDENT;  
19  
20 SELECT SUM(Marks) AS Total_Marks

```

The right pane shows the output of the queries. The first query displays a table of student data:

Student_ID	Student_Name	Class	Marks	Fee_Paid	Date_of_Birth
101	Rahul Sharma	10A	85	50000.00	2008-05-15

105	Rohit Verma	10A	65	40000.00	2009-01-30
Total_Marks			406		

The second query returns the sum of marks, which is 406.
